OVERVIEW
Through participation in lively discussion and stimulating debates, health care professionals in this program will learn about recent advances in the management of gastrointestinal (GI) cancers. Particular emphasis will be placed on the role of immune therapies and the sequencing and length of therapies in the treatment of colorectal, pancreatic, hepatocellular and gastric cancers.

AUDIENCE
This program is designed to meet the continuing education needs of oncologists, advanced practice providers, and allied health professionals.

LEARNING OBJECTIVES
At the end of this program, participants will be able to:
• Review the utility of immunotherapy in the treatment of GI malignancies.
• Compare variations in the sequencing and length of different treatment methods in the management of GI malignancies.
• Debate emerging therapeutic approaches to GI malignancies.
