Nursing Careers
at Duke Cancer Institute
The Duke Comprehensive Cancer Center was founded in 1972 as one of the nation’s first NCI-designated comprehensive cancer centers. Over the past four decades, Duke’s commitment to provide exceptional cancer care has intensified and strengthened. Recognizing ending cancer requires a weapon as adaptive and multiform as the disease itself, we have created one—a pioneering institute. Established in 2012, Duke Cancer Institute is a collaborative powerhouse—audacious, evolving, unconventional—at the center of a world-renowned university and medical center.

A Ground-Breaking Model For Care

Our flagship cancer center in Durham, North Carolina, brings together each patient’s clinical team and treatment resources in a single building—providing a total integration of education, research and world-class care. This is cancer care as it should be. And the results—exceptional patient experiences and superior, lifesaving outcomes. Our nurses are integral to the multidisciplinary care team. They support the care needs of our patients in the following oncology disease programs: cellular therapies, hematology, brain tumor, breast, endocrine, gastrointestinal, gynecological, gynecology, head and neck, melanoma, sarcoma and thoracic.

“What we do in research is so important because it does not just affect the patients we are treating now, but it affects patients who are not yet on our trials, have not yet come to Duke, may not have been diagnosed with cancer yet and may not have even been born yet.”

Wanda P. Honeycutt, RN, BSN, CCRP
Assistant Research Practice Manager
Phase 1, GI and Cancer Center Research Lab

A Critical Mass of Talent

At Duke, we know something about building great teams. We recruit and then help tomorrow’s superstars stand on the shoulders of today’s giants. Oncology nurses play an important role in community leadership, oncology research, nursing education and professional development. Our state-of-the-art cancer center and community-based sites offer our elite nursing candidates a broad spectrum of specialized programs and expertise in cutting-edge treatments. Our specialties include:

- Bone marrow and stem cell transplantation
- Infusion therapies
- Medical oncology
- Radiation therapy
- Surgical oncology
- Clinical Research

All of these specialties are seen across the inpatient and ambulatory care continuum. There is no better place to exercise and cultivate your talents, skills and passion for oncology nursing. Duke Cancer Institute cultivates and nurtures a collaborative culture and a patient-centered approach to care. Sign on for the opportunity of a lifetime to provide world-class care with America’s premier cancer center. Whether it’s in a clinic, a lab or on an inpatient unit, at Duke you know you are providing exceptional care, delivering hope, inspiring courage and serving as an advocate to those who need it most.

Nursing opportunities also exist at our other cancer centers in Wake County, including two cancer centers in Cary, North Carolina, and two cancer centers in Raleigh, North Carolina.

Our Locations

Duke Cancer Center Durham
Duke Cancer Center Raleigh
Duke Women’s Cancer Care Raleigh
Duke Cancer Center Cary
Duke Cancer Center Cary Radiation Oncology
Duke Cancer Center North Durham
Duke Surgical Oncology at North Duke Street

“I chose this field because I saw how well oncology nurses took care of my mother when she was ill. I want to help people through the challenges associated with cancer. It makes me happy to know I am making a difference.”

Olivia Franek, BSN, RN
Radiation Oncology

Benefits
Duke’s staff of nursing and healthcare professionals is among the most talented, dedicated and passionate in the industry. We equip our nurses with the tools and training they need to develop their skills to the maximum potential. Professional development programs for Duke nurses include:

- Certification Program
- Charge Nurse Program
- Oncology Nursing Center of Excellence
- Preceptor Program
- Educational Lectures

Duke Health provides a variety of benefits to our outstanding nurses so they continue to build upon their knowledge and skills.

“To me, our cancer patients are warriors. It’s a privilege to help them fight this battle.”
Simona Serio, RN
Medical Unit 9300
